

SPECIAL HOUR CELEBRATION

National Energy Conservation Day was celebrated as a special hour event on 14-Dec-2019. Students spoke of energy consumption in our day-to-day lives and expressed their thoughts and views on how to optimize our daily energy usage so as to conserve fossil fuels for a longer time. They emphasized the usage of energy-efficient electric items like LED bulbs.

National Mathematics Day was celebrated on 22-Dec-2019. On this occasion the students focused on famous mathematicians of our country, and particularly Srinivas Ramanujan, in memory of whom we celebrate this day in India. Students spoke of his inspiring genius, and Sri Prabhakar Shukla (faculty) shared tips and tricks to solve multiplications of larger numbers.

CHRISTMAS CELEBRATION

Students celebrating Christmas in the college

SELECTION COMMITTEE MEETING

A two-member team from Aryabhata Knowledge University visited our college on 20-Dec-2019 for the formal appointment of new faculty members and non-teaching staff. In this meeting Biru Paksh Mahto (Social Science), Dr. Manisha Kumari (History), and Roshan Kumar (Performing Arts) were regularized to the post of Assistant Professor. Abhishek Kumar was regularized to the post of Librarian and Arjun Pandey as facilities and store-in-charge.

We formally welcome all of them on board and wish them a happy tenure with us.

SCHOOL INTERNSHIP

Second Year D.El.Ed. students successfully completed their 3-month school internship and are now back in the college for their regular classes and workshops.

Second Year B.Ed. students continue their internship till 15th Feb 2020.

Regular classes continued for the 1st Year students of both courses.

The students of second year D.El.Ed have to submit report on their internship along with all the lesson plans that they had prepared during their practice teaching sessions.

STUDENT'S ARENA

My Experience of Practice Teaching.

I, Bushra Tabassum am a student of Amaltas College of Education and I want to share my experience of internship teaching. There are lots of experience we earn in our life but the experience of teaching those beautiful kids, educating those unique children or helping those marvelous students to explore was just out of the world.

In the beginning I was not interested in teaching at all but as much as I took part in the different activities, I started enjoying this beautiful service. On my first day of practice teaching I was scared, confused and feeling anxious about the classes. The number of students made me more frustrated that how would I manage such number of kids especially how to teach or educate them in a proper way. We had done our practice teaching in the college but under the observation of our professor which is a safe zone. But there in the school the situation was quite challenging. We had to handle all the circumstances by ourselves with confidence and we had to provide them right and factual information which was really a tough job. Finally I did it with enthusiasm and dedication. I had never thought that I would be teaching in a class.

My teaching experience has been incredible, and I think I learned as much from the class as I hope the students did. One of the reasons I enjoyed my teaching so much was because of the great students I had. I was guided by a good mentor and also got support of the teachers at the school. I had learned that teaching requires more than just reading notes loudly and guiding people through them. It requires reinforcement, seeking feedback and a million other things that I had never thought of. I owe a lot to my teachers who gave me incredible amount of assistance and advice. I want to thank all of them. I am truly looking forward to my career as a teacher.

- Bushra Tabassum (D.El.Ed.-2nd Year-2018-20)

My Internship Experience in School.

My name is Shruti and right now I am studying in D.El.Ed. second year. I went for the three months teaching practice and here I want to share some of my memories and observations. My teaching philosophy is simple as pie. Teach like it is your last day. Try to give your abecedarians all of your knowledge so that knowledge can multiply. My teaching experience has been incredible. I never had to drag myself to class or felt like it was a dreadful thing. Before I would start class especially for the first few times, I would get very nervous. But I began to really enjoy it and before long my anxiety about my teaching went away. I had wonderful students in my class. Just because the students were great, and the teaching was fun doesn't mean it was easy. Each one of my students (It still feels funny to call people 'my students') had different levels of understanding, different uses and different things they wanted to learn. The classes required a lot of preparations. My typical lesson planning session would go something like this: look over my feedback sheets to decide what I was going to teach. Do additional research to see if I missed key features that I would want to include. I learned that teaching is not only about the textbook, but a lot other things like understanding the psychology of the students and continuous feedback. I owe a lot to my teacher Biru Paksh Sir who gave me incredible assistance and support as a mentor. Lastly I would say " We do not learn from experience, we learn from reflecting on experience".-Shruti Kumari (D.El.Ed.-2nd Yr-2018-20)

Amaltas College of Education wishes you a New Year filled with new Hope, new Joy & new Beginnings...
Happy New Year - 2020!
